

LEARNING, EXPLORATION AND DEVELOPMENT (LEAD)

For licensed professionals, the **LEAD** Program contains a robust license database and license management tools that will enable employees to:

- Search license requirements and national certification requirements by state
- Monitor CE deadlines by date
- Assign courses to employees based on job role
- Upload custom learning content
- Track and report course completions and manage licenses

In addition to its best in class technical content, the **LEAD** program will also provide access to a comprehensive Professional Development library of courses in:

- Leadership
- Communication skills
- Business Development
- Project Management
- Cybersecurity
- Compliance

These professional development courses will help employees, both technical and non-technical, gain the “soft skills” necessary for a well-rounded career development foundation.
